

# CLIMATE MYTHS

## The Campaign Against Climate Science

"People can't affect climate." "It's the sun."  
"Models are unreliable." "There's no consensus."  
"Two degrees—big deal!" "Animals and plants can adapt."

Introduction by John H. Adams

Why has the U.S. apparently been caught off guard and left vulnerable to climate change?

Why have we been overtaken by an onslaught of extreme weather?

Why has Congress failed to enact badly needed climate legislation?

*Climate Myths* exposes the fossil fuel industry's disinformation campaign on climate change and carefully rebuts its myths using authoritative scientific sources.

Comes with a preface and foreword by two eminent climate scientists and an introduction by John H. Adams, winner of the 2010 Presidential Medal of Freedom.

***Climate Myths* can be ordered in paperback through Amazon, Barnes & Noble, Ingram, and your local bookstore. The eBook is available in all major formats, including Kindle, iBooks, Nook and PDF.**

### AVAILABLE NOW IN PAPERBACK & ALL EBOOK FORMATS

*Climate Myths* is for anyone who wants to understand the climate controversy or who is confused or skeptical about climate science, or wants to understand how powerful industries have dominated the U.S. climate debate.

### Description

Scientists have been warning the world for decades about the climate dangers—extreme weather in all its forms—linked to our continued heavy reliance on fossil fuels. Why haven't policy makers headed their warnings and acted long ago?

*Climate Myths: The Campaign Against Climate Science* explains why. It exposes the fossil fuel industries' successful-20 year campaign to mislead the public and legislators about climate change. It shows how this outrageous campaign managed to sow doubt and confusion about climate change through a well-paid network of prominent proxy organizations and special interest groups.

Beyond describing how valuable years slipped away during which needed U.S. climate legislation and global climate policy was stalemated, the book carefully dissects and rebuts the fossil fuel industry's main myths and misconceptions about climate change—in everyday language ordinary readers can understand.

Anyone curious about the politics of climate change and the strategy and tactics of the disinformation campaign need look no farther. The book will be of particular interest to the intellectually curious and to college faculty and students, environmentalists, activists, renewable energy advocates, and entrepreneurs as well as legislators and their staffs.

**JOHN J. BERGER** is the author and editor of 11 books on climate, energy, and natural resources. He is a graduate of Stanford University and has a master's in energy and natural resources from UC Berkeley and a Ph.D. in ecology from UC Davis. He has been a journalist, professor, and leader of national environmental organizations.

**DR. KEVIN TRENBERTH** is a distinguished senior scientist in the Climate Analysis Section at the National Center for Atmospheric Research.

**PROFESSOR JOHN HARTE** holds a joint professorship in the Energy and Resources Group and the Ecosystem Sciences Division of the College of Natural Resources at UC Berkeley.

**JOHN H. ADAMS** is the Founding Director of the Natural Resources Defense Council (NRDC) and Chair of the Open Space Institute.
